DETAILED ACTION

Receipt is acknowledged of Applicant's amendment filed on December 22, 2003.

Claim 29 was canceled. Claims 30-42 were added.

Claims 26-28 and 30-42 are presented for examination.

Response to Amendment

1. The amendment filed December 22, 2003 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "the relief portion ... instrument design" are not supported in the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 22, 2003 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Application/Control Number: 09/988,419 Page 3

Art Unit: 3723

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 4. Claim 42 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The subject matter of claim 42 is not supported in the original disclosure.
- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 26-28 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 26, the claims appear to be directed to the embodiment of Figs. 11-13.

However, claims 27-28 appear to be directed to the embodiment of Figs. 4-9. In the original disclosure, no support is found for the combination of Figs. 4-9 and Figs. 11-13. In claims 31 and 35, in the original disclosure, there is no support found for the combination (two components ... curvilinear-shaped surface) set forth in the claim.

Clarification is required.

Specification

7. Claim 30 is objected to because of the following informalities: it is unclear what the word "for" at the end of the claim meant to be. Appropriate correction is required.

Application/Control Number: 09/988,419

Art Unit: 3723

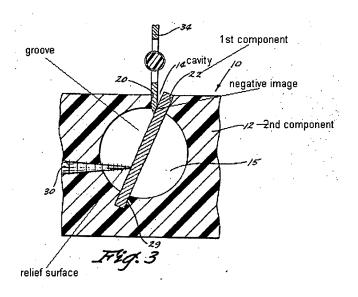

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claims 26-28 and 30-41, as well as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Sinclair'334.

With reference to Fig. 3, discloses the claimed invention including two components 22/12 when brought together forming a single block, cavity 14, groove (not referenced number) formed when component 22 inserted into cavity 14. When tool 24 is inserted into cavity 14, it forms a portion of negative image in said cavity. Relief surface is found further down in component 22.

Application/Control Number: 09/988,419 Page 5

Art Unit: 3723

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claim 42 is rejected under 35 U.S.C. 103(a) as being unpatentable over. Sinclair 334.

Sinclair has been discussed above, but does not disclose the Teflon material set forth in the claim.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have utilized Teflon as set forth in the claim, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Nguyen whose telephone number is 703-308-0163. The examiner can normally be reached on Monday-Friday/630AM-300PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 703-308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free)
